ISP Connections. Uninterrupted Power. Network Infrastructure. Server Hardware. Data Protection. System Maintenance and Support. Don't let computing needs distract you from developing your core business. Let Aktion invest in understanding, managing and supporting your Sage application.

Aktion Associates has been installing and supporting Sage applications for customers for more than 20 years, giving us unparalleled software expertise in the hosting community. We developed our data center not only to support Sage and its third-party vendor applications, but to be a scalable, secure, fully redundant, high-availability environment that meets our client's computing needs – today, tomorrow, and well into the future.

- Support of RDP for Windows 7, Windows 8.1 & Windows 10 computers
- Windows OS and Office updates, patches, and fixes
- Printing support on networked printers with PCL 5 or better
- Add/delete password reset for users to access your RDP environment
- Round the clock support and monitoring – 24/7 performance monitoring with on-call technical support
- Total technology partner – in-house IT expertise in the areas of servers, networking, security, and software

Applications are monitored 24/7 and hosted on the latest server/storage/back up technology in Aktion's secure, powerful Network Operations Center (NOC.)

- Automated disk to disk back up/recovery protocols
- Dedicated virtual environment for customers programs & data
- Firewall encrypted security
- Offering high availability environment with mobile Internet access
